

421 FORWARD

MARCH 2024

MAKE YOUR VOICE HEARD!

You're invited to attend a public information meeting about the 421 Forward project in Zionsville, Indiana. After a short video presentation, representatives from the Indiana Department of Transportation and American Structurepoint, lead design consultant, will be available to answer any questions and listen to your feedback!

The meeting will take place at 7 p.m. Wednesday, April 10, in the Ascension St. Vincent Community Room at Zionsville Town Hall, 1100 W. Oak St., Zionsville, Indiana.

WHAT LIES BENEATH

Did you know before any road project can be designed, a team of engineers must address an intricate underground maze of infrastructure? This aspect of a project is rarely seen or even considered by the traveling public, but the availability of clean water, waste removal, and phone and internet service is fundamental to daily life. Learn more about this important component of road projects here: www.421forward.com/news

PROJECT SCHEDULE

While a specific construction schedule has not been determined, the project team is gathering data and accepting public input about the project. Following the public information meeting, additional public engagement will take place through 2025. A draft environmental document is anticipated to be complete in late 2025 with a public hearing expected in 2026. See the schedule here: 421forward.com/about-421-forward
